

# Good Design

Good design is complicated enough to be intriguing to a target audience but simple enough to be understood. Form follows function.

I think this is a good design because it is complicated yet has a very simple concept. I think that it was designed to hold all your books in reach when your sitting in this what to appears to be comfy chair. This design was fairly simple, but if you think about it, it probably took a lot of work

thinking about the measurements, and making sure each spot for the books would be the same all around the chair. I think that the target audience would be people who read a lot of books or need more storage spaces, or just like the chair because it if funky looking. I personally think this chair has a lot of funk to it and it also is a very up to date modern look to it.
