

# GOOD

Good Design is complicated enough to be intriguing to a target audience but simple enough to be understood.

# DESIGN

I think that these lamps are a good example of good design. I think that many people would be interested in them, and would purchase these lamps, or lamps very similar to these ones. There are also people that would think they are not attractive at all. If we were to talk to the designer of these lamps, I think some people would be surprised about how much thought went into the design of them. When I look at the lamps, I see sticks, that got bent, and attached at the ends, creating a dome.

The designer however had to figure out every little thing about it. I believe that there was a lot of thought put into this design. I think it's complicated, but because to the average person it looks so simple, it is also simple. I think this object is one of those things that holds its beauty in the eye of only some people.
