

# Physics

## Author Team

### Dr. Lois Edwards

Professional Writer  
Cochrane, Alberta

### Greg Dick

Galt Collegiate Institute and Vocational School  
Cambridge, Ontario

### Robert Callcott

Formerly with Sutton District High School  
Sutton, Ontario

### Eric Brown

Physics Professor  
Seneca College  
Mississauga, Ontario

### Arthur N. Geddis

Formerly with University of Western Ontario  
London, Ontario

### David Gue

Crescent Heights High School  
Medicine Hat, Alberta

### Ed James

Waterloo District Board of Education  
Waterloo, Ontario

### Dr. Tom McCaul

Formerly with Bayview Secondary School  
Richmond Hill, Ontario

### Barry McGuire

Formerly with Western Canada High School  
Calgary, Alberta

## Consultants

### John Caranci

Formerly Program Team Leader for Mathematics  
and Science  
Earl Haig Secondary School  
Toronto, Ontario

### Cliff Coveyduc

Physics Test Specialist  
Nova Scotia Department of Education  
Halifax, Nova Scotia

### Douglas Hayhoe

Toronto District School Board  
Toronto, Ontario

### Terry Price

Huron Heights Secondary School  
Newmarket, Ontario

## Probeware Specialist

### John Braun

Formerly with Kingsville District High School  
Kingsville, Ontario

## Technology Consultants

### Khoi Trinh

Sir Oliver Mowat Collegiate Institute  
West Hill, Ontario

### Stephen Masson

R.H. King Academy  
Scarborough, Ontario

## Acknowledgements

The authors, editors, project manager, and publisher of *McGraw-Hill Physics* wish to extend our sincerest thanks to the talented and dedicated people who helped make this book a reality.

First and foremost, we are deeply grateful to Nova Scotia Science Consultant Cliff Coveyduc. Throughout the various stages of conceptualization, development, and production, he provided astute guidance and unwavering support to us in our endeavours to create the best possible resources for students and teachers alike. In addition, Cliff reviewed the entire manuscript and provided thoughtful and constructive feedback within incredibly tight timelines.

We wish to acknowledge, as well, the following reviewers from Fredericton High School in Fredericton, New Brunswick, for their insightful and supportive comments: Grant Williams, Martin Probert, and Dwight Dunfield. These highly professional physics educators fulfilled their assignments with care and thoroughness, despite extreme time pressures. Their enthusiastic collaboration greatly benefited senior author Dr. Lois Edwards and project manager Keith Owen Richards in their tireless commitment to producing high-quality material within the strictest possible timelines.

We acknowledge, with gratitude, the major contributions to the *McGraw-Hill Physics* program made by Robert Callcott (for his help with page proofing, accuracy checking, and *Teacher's Resource* consultation). We are also grateful to Dr. Tom McCaul for creating excellent additional performance tasks for posting to our web site, to match new material generated for the student text. We deeply appreciate the unflagging dedication of Greg Dick, who, despite a full teaching schedule, spent long hours, evenings, and weekends generating numerical answers to practice problems within the student text. Dr. Daniel Hudon took great care in supplying fully worked solutions to the student text problems for inclusion in the Solutions Manual of the *Teacher's Resource*.

We extend thanks not only to professional writer Kirsten Craven of Fredericton, New Brunswick, for writing a series of special features for this text, but also to the professionals whom she interviewed or profiled in these pieces: Alfred Byam, Bonnie Quinn, Dr. David Pink, Sean Ridgway, Alan Vowles, and Gerry Vowles. Thanks to each and every one of these individuals for helping us personalize the study of physics.

Last but not least, we wish to acknowledge the highly creative designers at Pronk&Associates without whose involvement we could not have produced this book on time.

### Pedagogical and Academic Reviewers

#### Cliff Coveyduc

Physics Test Specialist  
Nova Scotia Department of Education  
Halifax, Nova Scotia

#### Dwight Dunfield

Physics Instructor  
Fredericton High School  
Fredericton, New Brunswick

#### Martin Probert

Physics Instructor  
Fredericton High School  
Fredericton, New Brunswick

#### Grant Williams

Faculty Associate  
Department of Education  
University of New Brunswick  
Physics Instructor  
Fredericton High School  
Fredericton, New Brunswick

### Accuracy Reviewers

#### Dr. Andrew Billyard

Formerly with Queen's University  
Kingston, Ontario

#### Dr. Martin Edwards

Formerly with Royal Military College  
Kingston, Ontario

#### Harvey Weir

Memorial University of Newfoundland  
St. John's, Newfoundland and Labrador

### Safety Reviewers

#### John Henry

Science Teachers Association of Ontario Safety Committee  
Hamilton, Ontario

#### Margaret Redway

---------------	--------------	------------

<b>Chapter 8 Waves Transferring Energy . . . . .</b>	<b>336</b>
<i>Investigation 8-A: Waves in a Spring</i> . . . . .	337
8.1 Vibrations . . . . .	338
<i>Quick Lab: Natural Frequency of a Mass on a Spring</i> . . . . .	342
8.2 Wave Behaviour . . . . .	344
8.3 Interference of Waves . . . . .	354
<i>Quick Lab: Do Waves Pass Through or Bounce Off Each Other?</i> . . . . .	354
<i>Investigation 8-B: Wave Speed in a Spring</i> . . . . .	359
<i>Quick Lab: Standing Waves in a Thin Piece of Wood</i> . . . . .	361

8.4 Waves in Two Dimensions . . . . .	363
<i>Quick Lab: Waves on the Surface of Water</i> . . . . .	365
<i>Quick Lab: Diffracting Water Waves</i> . . . . .	366
<b>Physics &amp; Technology:</b> Poseidon’s Powerhouse: Converting Waves to Watts . . . . .	368
Chapter 8 Review . . . . .	371
<b>Chapter 9 Sound Waves and Electromagnetic Radiation . . . .</b>	<b>374</b>
<i>Multi-Lab: Properties of Sound and Light</i> . . . . .	375
9.1 Production and Propagation of Sound and Electromagnetic Waves . . . . .	376
9.2 Factors Related to the Speed of Waves . . . . .	385
<i>Quick Lab: At the Speed of Sound</i> . . . . .	390
<i>Investigation 9-A: Verifying Snell’s Law</i> . . . . .	402
<i>Quick Lab: Observing Total Internal Reflection</i> . . . . .	408
<i>Quick Lab: Determining the Critical Angle</i> . . . . .	414
9.3 Interference of Waves and Related Properties . . . . .	415
<i>Quick Lab: Resonance Lengths of a Closed     Air Column</i> . . . . .	416
<i>Investigation 9-B: Determining the Speed of     Sound in Air</i> . . . . .	424
<i>Quick Lab: Locating Interference Between     Two Loudspeakers</i> . . . . .	428
<i>Quick Lab: Diffraction of Sound</i> . . . . .	432
<i>Investigation 9-C: Young’s Double-Slit Experiment</i> . . . . .	439
<b>Careers in Physics:</b> Sounds From The Seabed . . . . .	440
Chapter 9 Review . . . . .	441
Unit 4 Review . . . . .	446

**UNIT 5 Force, Motion, Work, and Energy 450**

<b>Chapter 10 Applications of Forces . . . . .</b>	<b>452</b>
<i>Multi-Lab: Location of Force Affects Motion</i> . . . . .	453
10.1 Using Vector Components to Analyze Motion . . . . .	454
<i>Quick Lab: Maintaining Equilibrium</i> . . . . .	468
10.2 Multiple Masses . . . . .	476
<i>Investigation 10-A: Atwood’s Machine</i> . . . . .	480
10.3 Static Equilibrium and Torque . . . . .	490
<i>Quick Lab: Build a Mobile</i> . . . . .	502

10.4	Collisions and Explosions . . . . .	503
	<i>Investigation 10-B: Collisions in Two Dimensions</i> . . . . .	516
	Chapter 10 Review . . . . .	527
	<b>Chapter 11 Projectiles and Circular Motion</b> . . . . .	<b>530</b>
	<i>Multi-Lab: Motion in Two Dimensions</i> . . . . .	531
11.1	Projectile Motion . . . . .	532
	<i>Investigation 11-A: The Components of</i> Projectile Motion . . . . .	538
	<i>Quick Lab: Maximum Range of a Projectile</i> . . . . .	544
	<b>Careers in Physics:</b> Tackling Biofilms with Computers . . . . .	550
11.2	Uniform Circular Motion . . . . .	551
	<i>Investigation 11-B: Verifying the Circular</i> Motion Equation . . . . .	561
	<b>Careers in Physics:</b> Physics Goes to the Fair . . . . .	568
	Chapter 11 Review . . . . .	569
	<b>Chapter 12 Universal Gravitation</b> . . . . .	<b>572</b>
	<i>Quick Lab: Kepler's Empirical Equations</i> . . . . .	573
12.1	Newton's Law of Universal Gravitation . . . . .	574
	<i>Investigation 12-A: Orbital Speed of Planets</i> . . . . .	581
12.2	Planetary and Satellite Motion . . . . .	587
	<b>Physics &amp; Technology:</b> Simulating Microgravity . . . . .	593
	Chapter 12 Review . . . . .	595
	<b>Chapter 13 Simple Harmonic Motion</b> . . . . .	<b>598</b>
	<i>Investigation 13-A: A Projectile Spring</i> . . . . .	599
13.1	Describing Periodic Motion . . . . .	600
	<i>Investigation 13-B: The Period of a Mass on a Spring</i> . . . . .	609
	<i>Quick Lab: Measuring the Value of <math>g</math>, the</i> Acceleration Due to Gravity . . . . .	612
13.2	Motion Under a Linear Restoring Force . . . . .	615
	<i>Investigation 13-C: Position, Velocity, and</i> Acceleration and Simple Harmonic Motion . . . . .	616
	<i>Quick Lab: Graphing the Motion of a Simple</i> Harmonic Oscillator . . . . .	620
	Chapter 13 Review . . . . .	622
	Unit 5 Review . . . . .	624

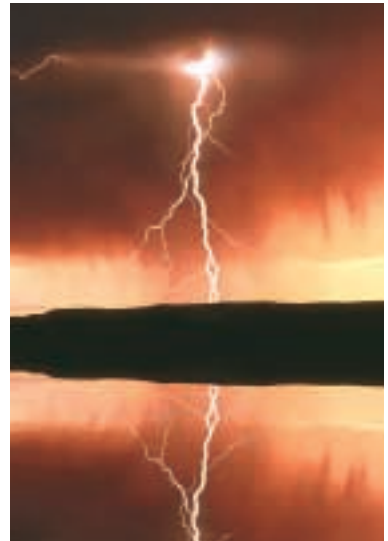

**Chapter 14 Fields and Forces . . . . . 630**
