

6.4 Solving Trig Equations Using Identities

Look at the 4 examples in section 6.4 in your textbook. Read through them very carefully. Make sure you understand the processes demonstrated in each example. Consider copying the examples into your notes. Ask me if you have questions about any of the steps.

Practice: pg. 320-321 #1-12, 14-16, C1, C2

Aim to be finished all of this practice by the end of Friday's class. Then you can devote the weekend and Monday's class to review.

*Tuesday's test covers all trig concepts, but primarily chapter 6. Look at the review material at the end of chapters 4, 5 and 6, as well as the cumulative review after chapter 6.
